

Clinical Densitometry Training Course. 29th and 30th July 2023

Training courses for practitioners and operators involved with bone densitometry presented by Osteoporosis New Zealand in conjunction with Australian and New Zealand Bone and Mineral Society.

This intensive clinical densitometry course is intended for both doctors and technologists. It covers the patho-physiology of osteoporosis, as well as the principles and practice of bone densitometry, body composition measurement and reporting of scans.

You should consider this course if:

- You have a tertiary education in a science-based course, including nursing, and you have not previously received formal training for bone densitometry.
- You are currently a DXA operator who has not undertaken formal training or who is seeking an advanced update of their work practices.
- You are a medical specialist, or specialist registrar in training, with responsibility for bone density testing and are seeking deeper knowledge of the technological and quality assurance aspects of bone densitometry measurements and reporting.

Course structure:

- Participants are provided with extensive online course material prior to the commencement of the course and are required to read through all the material before they attend the lecture series.
- Hardcopies are not available, but course participants may print the material for their own use.
- Participants then attend a two-day lecture & workshop series, which includes interactive sessions allowing use of manufacturer specific DXA software.
- Additional online material is provided after the course.
- An online multiple-choice examination is held two weeks after completion of the lecture series.

Date: 29th and 30th July 2023.

Venue: Faculty of Medicine and Health Sciences, 85 Park Road, Grafton, Auckland, New Zealand

Course Cost: Online Registration: \$NZD 800 (GST inc.)* * A \$50 administration fee will be charged on any cancellations
