

2nd ASIA-PACIFIC REGIONAL EXPERT MEETING ON THE PREVENTION AND MANAGEMENT OF FRAGILITY FRACTURES

Seamless Care in Fragility Fracture

27-28th March 2020

Menara Selatan
University Malaya Medical Centre
Kuala Lumpur, Malaysia.

2nd FFN Asia Pacific Regional Expert Meeting

Because of its rapidly ageing population, the Asia Pacific region will see a pandemic of hip fractures and other fragility fractures in the next few decades. The Fragility Fracture Network (FFN) – a global organisation – offers a way to meet this challenge, which was published by FFN plus other international organisations in 2018 as a Call to Action¹, through a combination of:

- preventing as many fractures as possible by secondary prevention after every fragility fracture
- treating those that do occur in the best and most cost-effective way, through multidisciplinary co-management, in both the perioperative and rehabilitation phases
- creating multidisciplinary national alliances that can bring about the necessary changes in health care policy to facilitate these actions

Fourteen National FFNs are established around the world, including 8 in the Asia Pacific region in the following countries: China, India, Japan, Korea, Malaysia, Nepal, Philippines and Thailand. The Fragility Fracture Network Malaysia (FFNM), which was formed in August 2018, has braved the idea of hosting the next Asia Pacific regional meeting. Our aim is to bring together surgeons, physicians skilled in care of the elderly, anesthetists, rehabilitation physicians, nurses and allied health professionals nationally to drive policy change and improve quality of care in patients with fragility fracture.

The 2nd Asia Pacific FFN Regional Expert Meeting will focus on how to implement the recommendations of the Call to Action and explore all the issues surrounding fragility fractures in the elderly patient, including the lessons that have been learned about setting up national FFNs and achieving healthcare policy change.

The meeting will be held at Menara Selatan, University of Malaya Medical Centre and will be hosted by FFN Malaysia.
